

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE AMERICAN NATURALIST

A MONTHLY JOURNAL
DEVOTED TO THE NATURAL SCIENCES
IN THEIR WIDEST SENSE

CONTENTS

- I. On the Proposed University of the United States and Its Possible Relations to Scientific Bureaus of the Government
Dr. WILLIAM HEALEY DALL
- II. The Relation between Forestry and Geology in New Jersey. Part
II. Historical Development of the Flora . . . Dr. ARTHUR HOLLICK
- III. The Wings of Insects, IV. *Continued*
Professors J. H. COMSTOCK and J. G. NEEDHAM
- IV. The Penepplain: A Review . . . Dr. R. A. DALY
- V. A Peculiar Toad . . . Professor F. L. WASHBURN
- VI. Human Remains from the Trenton Gravels . . . Dr. FRANK RUSSELL
- VII. Editorial
- VIII. Reviews of Recent Literature: *Anthropology*, Report of the Smithsonian Institution, Report of the Anthropological Work in the State Institution for Feeble-Minded Children, Anthropological Notes — *Zoölogy*, Dimorphism in *Crepidula*, British Entomostraca, Rotifers of the Leman, Classification of the Centropagidae, A New Rhizopod Parasite in Man, American Fishes, Fauna and Flora of the Catskills, Notes — *Botany*, California Plants in their Homes, Van Tieghem's *Éléments de Botanique*, Are Bacteria Fungi? Dr. Bolander, The Costa Rica Flora, Urban's West Indian Flora, Bailey's Evolution of our Native Fruits, Poisonous Grains, Botanical Notes — *Paleontology*, Habits of *Thylacoleo* — *Petrography*, Marble, Grits Metamorphosed into Crystalline Schists, Dioritic Rocks of the Pusterthal, Three California Rocks, An Acid Pegmatite in a Basic Rock, Notes
- IX. Scientific News
- X. Publications Received

THE AMERICAN NATURALIST is an illustrated monthly magazine of Natural History, and will aim to present to its readers the leading facts and discoveries in Anthropology, General Biology, Zoology, Botany, Paleontology, Geology and Physical Geography, and Mineralogy and Petrography. The contents each month will consist of leading original articles containing accounts and discussions of new discoveries, reports of scientific expeditions, biographical notices of distinguished naturalists, or critical summaries of progress in some line; and in addition to these there will be briefer articles on various points of interest, editorial comments on scientific questions of the day, critical reviews of recent literature, and a final department for scientific news and personal notices.

All naturalists who have anything interesting to say are invited to send in their contributions, but the editors will endeavor to select for publication only that which is of truly scientific value and at the same time written so as to be intelligible, instructive, and interesting to the general scientific reader.

All manuscripts, books for review, exchanges, etc., should be sent to THE AMERICAN NATURALIST, Cambridge, Mass.

All business communications should be sent direct to the publishers.

Annual subscription, \$4.00, net, in advance. Single copies, 35 cents.
Foreign subscription, \$4.60.
